SUMMARY

Results-driven **Machine Learning Engineer** with expertise in **BentoML** packaging, AWS SageMaker, and Python. Proven track record in deploying and optimizing ML models to meet client needs. Former **Solutions Architect**, leading **modernization efforts, agile transformations, and software optimization**. Adept at ensuring software quality through **rigorous regression and system-level testing**, driving improved functionality and cost reduction. Passionate about delivering **high-impact AI/ML solutions** aligned with strategic business objectives.

WORK EXPERIENCE

Sept 2024 - Present

Capgemini

Generative AI Engineer

- Utilized BentoML and Terraform on AWS Sagemaker to develop and deploy machine learning models, resulting in enhanced performance.
- Cooperated with the Capgemini team to refine machine learning models, demonstrating expertise in machine learning engineering and AWS cloud services.

Sept 2021 - Sept 2024

Solutions Architect/Manager

- Revamped legacy code bases to enhance functionality and reduce operating costs through the introduction of agile methodologies.
- Collaborated with project managers to establish coding milestones, thereby optimizing product development processes.

May 2019 - Sept 2021

Senior Consultant

- Conducted rigorous regression and system testing to ensure software quality prior to release, ensuring seamless deployment.
- Transformed legacy code by modernizing and optimizing it, resulting in reduced costs and enhanced functionality.
- Implemented agile methodologies to revolutionize product development, fostering collaboration and efficiency.

Sept 2018 - May 2019

Indigo Consulting

Senior Python Developer

- Improved Scrum practices adoption, resulting in 30% reduction in project timelines and 25% increase in team productivity.
- Collaborated with QA team to ensure 99.9% accuracy in software development changes, leading to a 50% decrease in defects.
- Identified and implemented system enhancements, resulting in 40% optimization of processes and 20% reduction in costs.

Dec 2017 - Sept 2018

Sirez Ltd

Senior Software Engineering

- Led technical upgrade projects for clients, collaborating with consultants and developers for seamless integrations.
- Established regular communication channels with customers to ensure smooth data exchange and technology integration.
- Conducted comprehensive reviews of architecture design, implementation, testing, and deployment requirements for accurate project scoping.

Apr 2017 - Nov 2017

Innodata

Senior Software Engineer

- Led a team of 20 employees, providing expert coaching and constructive feedback to promote individual and team professional growth.
- Fostered collaboration with cross-functional teams to drive strategic network design initiatives, aligning with company growth objectives and enhancing overall business performance.
- Streamlined operational efficiency by implementing warehouse management system software integrations, resulting in improved productivity and reduced costs.
- Designed and developed a PDF to XML conversion solution utilizing Python and PySide technologies, showcasing technical expertise and problem-solving skills.

Nov 2015 - Nov 2016

Chetu India

Senior Software Engineer

- Collaborated with cross-functional teams to design and implement high availability solutions for mission-critical applications.
- Designed and implemented robust procedures for system monitoring, recovery, backup, and optimization to ensure business continuity.
- Led large-scale software deployments with comprehensive testing and feature enhancements to deliver seamless and efficient solutions.

Feb 2015 - Nov 2015

Pytechnologies

Senior Software Engineer

- Utilized cross-functional collaboration to develop and deliver 15 high-impact solutions for critical applications, resulting in a 25% increase in customer satisfaction.
- Designed and implemented procedures for system monitoring, recovery, backup, and optimization, ensuring 99.99% uptime and reducing downtime by 30%.
- Led large-scale software deployments, successfully maintaining ERP software solutions for 10 prominent clients, driving a 20% increase in business growth and 15% improvement in operational efficiency.
- Introduced agile methodologies and best practices, driving continuous improvement and fostering a culture of innovation and excellence, resulting in a 35% reduction in project timelines and a 25% increase in team productivity.

Mar 2011 - Feb 2015

One97

Senior Associate

- Led a team of 15 individuals, ensuring effective performance and professional growth.
- Designed optimized configurations for OBD dialers to streamline call flow and processing efficiency.
- Utilized expertise in MySQL query design to achieve efficient data retrieval and manipulation.

PROJECTS

Dec 2024 - Feb 2025

Sentimental Analysis Bot

- Developed a sentiment analysis bot for a client, enabling predictive insights on customer purchasing behavior following product calls
- Designed and implemented a machine learning model to accurately forecast user purchasing decisions based on product interactions

- Sept 2024 - Dec 2024

ChatBot for Video

 - Developed a chatbot for a client, utilizing Python, Langchain, and RAG Bot to enable users to engage with video content and receive accurate answers to related questions.
 - Designed a conversational AI solution that leverages video-based interactions, integrating Python, Langchain, and RAG Bot to provide users with informative and relevant responses.
- May 2019 - Dec 2023

AT&T

 - Designed and developed a microservice-based website using Python, Django, and Angular, featuring event-driven architecture and client-side configuration uploading for router management.
 - Developed a Natural Language Processing (NLP) query bot that enables clients to connect to their designated databases, providing prompts that are converted to SQL queries and yielding results on the frontend.

EDUCATION

2006 - 2010

PDM College of Engineering

Computer Science and Engineering - 70

SKILLS

- Proficient in **Python** programming language
- Experienced in web development frameworks such as **Django, Flask, and Fast API**
- Skilled in **Generative AI** and its applications
- Familiar with **Artificial Intelligence and Machine Learning** concepts
- Proficient in cloud computing platforms, including AWS and Azure

EDUCATION

2006 - 2010

PDM College of Engineering

Computer Science and Engineering - 70

CERTIFICATE

- AWS Partner: Generative AI Essentials (Business) 
- AI For Everyone 
- Create Serverless Applications 

EDUCATION

2006 - 2010

PDM College of Engineering

Computer Science and Engineering - 70
